online catalogues

Find articles online:

Saskatchewan libraries subscribe to magazines and journals so you don't have to! Visit your library's website for access to more than 7,000 full-text magazines and newspapers, available online. These include health, consumer and children's information and more. You may need a library card and a library-issued password to access the databases.

Ask a question:

Do you need help finding information, identifying that book or getting a quick fact? Visit your library's website to ask a question! Each library has its own question and answer service. There is also a province-wide network of library professionals that will answer your questions through the Ask Us! service. You can ask a question, day or night, right here, right now.

Find books & other materials:

The library catalogue is a search tool for finding books, music CDs, videos, DVDs, and magazines available at the library. Visit your library's website to use the catalogue. In addition, the Saskatchewan Libraries Gateway provides single-search access to all public library catalogues in Saskatchewan. If you don't find what you want at your library, ask about borrowing materials from other libraries.

welcome to your Saskatchewan e-library services and resources
